Applied Formal Methods: Student's Presentation Evaluation Form

[2] 1. What did you learn today? List at least three things you took away from today's class material.

[1] 2. Was the presentation clear? What did you like about the way your classmate explained the materials to you? What constructive suggestions do you have to offer this classmate about how to present the material more clearly? (Your response will not be passed on to your classmate, however, an anonymized summary of all suggestions may be presented in class at the professor's discretion.)

[1] 3. Was the content of the paper useful? Do you think the authors have contributed something that you or others might use or build upon in a future foray into formal verification? Why or why not?

[1] 4. Is today's paper/formal method/topic something you think would be useful to examine in more depth in this class? Why or why not? Some paper topics may be covered in more depth following student presentations in the upcoming weeks; some may be earmarked for updating this class the next time it is taught.
